

FACTSHEET

Generate Confidence Whilst Maximizing Value In Your Data

Comprehensive standardization and QC procedures

Flexible and customizable curve alias tables for curves, units and more

Feeds directly into Geoscience workflows minimizing end-user uncertainty

Built From The Ground Up To Support Core Data

Dedicated bulk loaders to handle tabular, textural and image data

Flexible structure supports all types of wellbore data

Industry leading core data storage and management solution

Multi-Scale Visualization & Processing Brings Clarity To Your Data

View data at its native scale and resolution to integrate from micro to macro

Intuitive Geoscience workflows enhanced by multi-scale displays

Bring all your data together on one interactive and configurable view

An Enterprise Solution That Integrates Into Your Current Environment

Connect to other applications to remove the risk of data siloing and duplication

Bring multiple sources of information together to create the full picture

Transfer data to other analytical packages seamlessly

Reach Your Data In Seconds... Not Days

All data stored in a searchable, organized repository for easy access

Powerful exporting options provides data when required

Desktop and web portals provides access to data anywhere in the world
